## SINGLE SKIN ROLLER SHUTTER DOORS

Kaiser traditional roller shutter doors are tough and durable, but easy to operate and maintain. These doors are made with galvanized lath for easy and economic replacement with an option for plasticol and powder coating. Wicket doors can be added so entry may be gained without opening the complete shutter. Size range up to 60m<sup>2</sup>.

## TWIN SKIN INSULATED ROLLER SHUTTER DOORS

Takes the compact design of a traditional roller shutter and adds energy and acoustic efficiency. Purpose designed interlocking lath in-filled with insulation and all round weather seals make these the ideal solution where insulation to a value of 0.7W/m<sup>2</sup>K is required.

## HIGH SECURITY ROLLER SHUTTER DOORS

These dramatically increase the amount of time it takes a burglar, using high speed cutting tools, to attempt to enter a building. They offer complete protection for your stock, increase your security and could lower your insurance premiums.

## HIGH SPEED DOORS

The Kaiser Pack and Kaiser Roll high speed doors reduce energy costs, create a more comfortable working environment and improve productivity due to markedly reduced operating times. For most companies controlling energy costs is a top priority and high speed doors offer very quick payback periods.

## KAISER ROLL HIGH SPEED DOOR

The Kaiser Roll is a high speed energy saving door with a roll-up action ideally suited for intensive internal use. Low cost maintenance and trouble free operation has made this door the industry standard.

## KAISER PACK HIGH SPEED DOOR

The Kaiser-Pack is a strongly constructed energy saving high speed door with a fold-up action designed to resist winds of over 60mph. The curtain is a multi-layered high frequency welded PVC and polyester 900g/m<sup>2</sup> screen ensuring very high tear resistance, long life and low maintenance and repair costs.

## FULLY GLAZED OVERHEAD DOORS

The Kaiser Glazed Sectional Overhead is designed for applications where light, good visibility, aesthetics and energy efficiency are the main criteria. Stiffened extruded aluminium sections provide a very strong door with watertight seals to the single or double glazed units. Standard configuration is for the bottom panel to be closed with an insulated infill, with a variety of alternatives and coloured finishes. Personnel doors and ventilation units can also be incorporated.

## INSULATED SECTIONAL OVERHEAD DOORS

Ideal for all warehousing, loading bays, insulated units or anywhere an insulation value of  $0.43W/m^2K$  is required. The 600mm deep panels are counterbalanced to perfection to ensure ease of operation. The doors can be powder coated to match corporate colour schemes to give excellent aesthetics.

## PVC STRIP CURTAINS

PVC Strip Curtains reduce heat loss where access to premises is by a main door or used internally to enhance the working environment by draught, dust and sound reduction. For refrigeration purposes our Super Cold PVC Strip will remain unaffected in temperatures as low as  $-45$  degrees celsius.

## STEEL HINGED SECURITY DOORS

When you specify a Kaiser Security Door you are guaranteed peace of mind as the door performance has been third party tested by a UKAS accredited test house. With a range of five different security levels we have a security door to suit every application

## STEEL HINGED FIRE RATED DOORS

Our Steel Fire Rated Doors are issued with a certificate of four hours on a double door set and six hours on a single door set. Both doorsets can have glazing and still carry the same certifications.

**HIGH RISK**  
VERY HIGH  
SECURITY DOORSETS  
LEVELS SD5 & SD4

•  
Products tested to these security standards have resisted a series of professional attack tests each lasting up to 30 mins using a wide variety of powerful mains operated tools.

## Kaiser Doors Limited

Kaiser Doors Limited has a mission to provide an unrivalled, full service capability in the manufacture, installation, repair, and maintenance of all types of commercial and industrial doors. A total service approach has arisen from our experience in meeting customer requirements at every stage. Kaiser Doors Limited offers guidance, advice and product aftercare in support of a product range that is competitive on many more levels than price alone.

## Service And Maintenance

We operate a nationwide repair and maintenance service with a network of strategically sited locations. Each location carries a comprehensive stock of spare parts so that we are able to provide a rapid response to all emergency calls. This service, coupled with our Planned Maintenance Programme will help ensure your organisation is kept operational and that your Health and Safety obligations are met.

## 24 Hour Response

Our central hub is staffed 24 hours a day, 7 days a week and when you call you will come straight through to a service adviser or engineer when calling outside normal working hours. The number is 01905 330533. Our export department is able to discuss your requirement in a number of European languages.

## Our Customers

Our customers include prominent high street retailers and construction companies, major industrial and commercial organisations, Government departments and the Armed Services.

## Health And Safety

We take our responsibilities to Health and Safety very seriously. Comprehensive and detailed risk assessments and method statements are provided for each of our installations and we hold Public and Products Liability Insurance up to £5,000,000.

## Warranty

We warranty all our doors free from manufacturer's defects for a period of twelve months from the commissioning date. The warranty also covers call out charges and fitting charges for replacement parts supplied under the warranty. The warranty does not cover repairs due to accidental damage or misuse, fair wear and tear or any loss of use while replacement parts are being supplied or fitted.

## Support

Should you have a requirement that is not featured on our website, please do not hesitate to contact us to discuss further.
