

SECURITY DOOR 5

SECURITY DOORS STEEL DOOR SYSTEMS

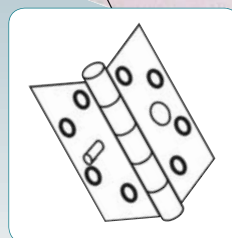

Designed as a range of single and double security doors to protect extremely high risk properties from professional attempts at forced entry regardless of noise, using a range of heavy hand and power tools.

The doors are third party tested in accordance with the Swedish standard SS 81 73 45 and is equivalent to achieving a level 5 rating to LPS 1175 Standard. With this door we are offering you guaranteed peace of mind.

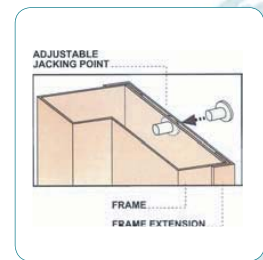

Adaptable Fixing System

Adjustable fixing feet allow standard width doors to be used in non-standard width openings when used in conjunction with our variable sub frame system.

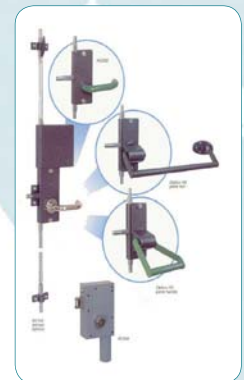

Attack-Resistant Hinge

3 No Specially Modified lift off hinges. Frame jamb complete with security dog bolts prevent the door being removed from the opening.

Heavy Gauge Frame

High security 2 part frame system allows for highest security, the first part is fitted in situ and the second welded to it on site to protect the fixing points.

Secure Locking

High Security Claves 22001 multi point deadlock or High Security Multipoint Panic furniture from Surelock McGill or Exidor.

Anti-jemmy Astragal

To prevent the door leaf being jemmied open it is supplied with an integral Astragal.

Robust Door Leaf

62mm thick door blade with a total armour thickness of 9mm.
